Installation for 2 bases with two table tops

Parts

Top

Flat Brackets

Assembled Bases

Wood Screws

Step 1:

Turn over tops and slide together to be able to screw in the bases.

Step 2:

Next place one base on each table top and center it. Attach bases by the side with the holes on to the top. Screw the bases into the top.

Step 3:

After the two bases are attached, place flat brackets on the connecting line of the tops at an angle (see image below). Then screw into place.

Step 4:

Stand table right side up.

Flat Bracket

Flat Brackets will be needed on certain size tables for extra support.

***Make sure flat brackets are secure before attaching a third base or standing table upright.**

***General Instructions:**
Actual product may vary slightly

Installation for 3 or more bases with 3 table tops

Step 1:

Turn over tops and slide together to be able to screw in the bases.

Step 2:

Next place one base on each table top and center it. Attach bases by the side with the holes on to the top. Screw the bases into the top.

Step 3:

After the three bases are attached, place flat brackets on the connecting lines of the tops at an angle (see image below). Then screw into place.

Step 4:

Stand table right side up.
