# SAPPHIRE CUBICLE SYSTEM

The Sapphire Cubicle System by SKUTCHI Designs Inc. ® is an inspired and elegant cubicle solution for office spaces and work environments of all shapes and sizes. Whether you're looking to create individually furnished cubicle workspaces for 3 people or 300, the Sapphire Cubicle System allows scalable, interconnected workstations which are both modular and allow for near limitless customization. The Sapphire Cubicle System frames are constructed from incredibly strong yet, extremely lightweight, commercial-grade aluminum frames. These frames, along with distinctly shaped frame connectors create virtually unlimited and uniquely shaped wall structures. If cubicle spaces require electrical outlets or data network cable, the Sapphire Cubicle System frames offers built-in "raceways" to provide hidden and seamless electric and data integration. The panel thickness is 3 1/4" with available finishes of fabric, laminate, or tempered glass panels reaching 39", 52", or 65" in height (customer heights available upon request). Fabric panels offer 14 different colors, laminate panels have 4 different surface textures, and the tempered glass panels can either be clear or choose from 8 different film appliques to enhance privacy or add distinctive flair. The Sapphire Cubicle System offers more than just walls and panels. Choose from an enormous inventory of ergonomically designed furniture and accessories such as workstation desktops, sit-to-stand desks, locking file storage cabinets, scalable shelving, locking overhead storage containers, padded-top sit and storage benches, paper racks, bookshelves, and accessory rails.

In short, the Sapphire Cubicle System is an "all-in-one" solution for businesses of all sizes. It allows you to create cubicle walls up to 65" in height as well as furnish those areas with compatible office furniture and accessories. If cubicle walls are needed which exceed 65" in height, or require locking doors, be sure to check out our Sapphire Wall System catalog.

Since the form and function of the Sapphire Cubicle System is modular in its design, it can be expanded out, combined with, moved around, replaced, demounted, and have its furniture exchanged between cubicles if ever needed. All materials used with the Sapphire Cubicle System meet or exceed the safety and durability specifications set forth by the American National Standards Institute and the Business and Institutional Furniture Manufacturers Association.

- 6" cable channel on the base of each panel, beltline available upon request
- Panel thickness: 3 1/4"
- Glass thickness: 3/8"
- Frames & connections: Aluminum
- Optional interior furnishings available
- Custom and quick-ship options available
- ANSI/BIFMA
- Fabric ISO 9001
- Electric: UL Listed

Sapphire Cubicle System Electric Raceway - Open

## FINAL CONNECTION IS DONE BY A LICENSED ELECTRICIAN

**WARNING:** Risk of fire or electric shock. As with all non-directional systems, do not electrically connect panel to more than one supply source. Always determine that the panel is electrically connected to one and only one source of supply. Before using any equipment, check the entire system for polarity, continuity, and grounding integrity.

Example System

Click-Latch Device: When installing this system, ensure the connectors have securely clicked into position.

8 WIRE 3 CIRCUIT DIAGRAM  
(83 SYSTEM)

### Power Supply Connection

The Power System is an eight wire system consisting of four individual circuits rated at 20 amps/120 volts maximum. Circuit 1 (black), circuit 2 (red), and circuit 4 (pink), are served by a system neutral (white) and an equipment ground (green). Circuit 3 (blue) uses an isolated neutral (gray), and an isolated ground (green/yellow). The system may be supplied by a three phase power system with four individual circuits rated 20 amps/120 volts maximum, or as permitted by local code.

**When connecting electric pass throughs to power moduls, please make sure ARROW is up**

### Environmentally Sustainable

Our stone wool production process uses some of the most advanced technology available. The last decade has seen a new generation of ROXUL manufacturing advancements designed to lower our environmental footprint. These endeavors have included:

- the capture and recycling of rainwater;
- reduction in energy consumption;
- recycling of raw materials back into the production process;
- the use of natural lighting in our facilities; and
- repurposing water used during the manufacturing process.

### Moisture Resistance

ROCKBOARD® 40/60/80 ASTM C 1104	Moisture Sorption	<0.08%
