Description

Get the most out of your office with our eSCAPE acoustic solutions. With its sound dampening abilities combined with the fact that it is made from recycled plastic and has a felt like material you can feel good about including these aesthetics in your workplace.

eSCAPE Acoustic solutions is cost effective and easily installed. Choose from any of our 15 color options and stock designs or combined colors and have your design completely customized the choice is in your hands.

Choose from our stock designs or have a customized acoustic solution created. Speak with one of our sales representatives at **888-993-3757** to discuss your options or email **sales@skutchi.com**.

Key Features

- Made from recycled material
- 18 color options available
- Custom designs available
- Easily installed

- Panel thickness: 12mm
- NRC Rating: 0.25-0.75
- Fireproof Level: B1

Create wall art, stand alone panels, or hanging acoustic solutions. There's no limit to the possibilities of our eSCAPE Acoustic Solutions. SKUTCHI Designs Inc. can also create completely custom solutions to best fit your office.

How Much Sound do eSCAPE Panels Absorb?

The International Organization for Standardization (IOS) uses the testing method known as ISO 354 to measure the Noise Reduction Coefficient of a material.

In order to understand the sound reducing effectiveness our eSCAPE panels, it's important to remember that the absorption of soundwaves is different for every frequency. For example, a high frequency sound with a short wavelength (human voices, telephones ringing, appliances beeping, et al.) can be absorbed more efficiently by our eSCAPE panels, while lower frequency sounds aren't absorbed as effectively, due to their longer wavelength.

It's important to remember the overall area of a room, the walls/ceiling/floor of a room, even the temperature of a room has an effect on how best (and how much) sound can be absorbed.

Our eSCAPE panels measure an average 0.6 (60%) reduction of lower frequency sounds and a 0.75 (75%) reduction of higher frequency sound in most environments. Our panels are not designed to eliminate all noise, but they effectively reduce the widest range of ambient noise in your workspace

eSCAPE Color Options

Styles

Wall Art

Mounts to the wall

Hanging Art

Hangs from the ceiling by an attached beam (included) to create dividers in a room.

Ceiling Panels

Hangs from the ceiling.

Acoustic Ceiling Baffles

Too much noise, too many people talking, phones that continually ring—the worst kinds of distractions are the ones we hear more than the ones we see. Acoustic ceiling baffles are a decorative way to visually enhance your office, but also effective at reducing distracting office noises.

Acoustic Slat Wall Panel

The acoustic slat wood wall panels are beautifully designed wood strip decorative wall and ceiling panels. Each panel also has sound dampening properties, reducing echo in any room and making your space feel finished, comfortable, and welcoming. The panels can be easily applied to both walls and ceilings.

Mount Options

Mounts

SKU	Description	Prices
DMC	Desktop mounted clamp	\$7.43
DMCPL	Desktop mounted clamp with base	\$14.02
EMCKB	Edge clamp	\$12.06
CEC	Cubicle extender clamp	\$13.46
SPC	Single partition clamp	\$7.80
DPC	Double partition clamp	\$9.36
MPC	Modesty Panel Clamp	\$18.29

Modesty Panel Clamp - Mounts a modesty panel to the underside of a work-surface

Desktop mounted clamp - Mounts on top of the work-surface or on top of a panel for panel extenders

*If using as a panel extender, the panels must be at least 1 1/2" thick.

Single Partition Clamp - Mounts to front or side of the work-surface

*Mount Opening: 3/4"

Double Partition Clamp - Mounts two work-surfaces together

*Mount Openings: 3/4"

Edge Clamp w/ Knob - Mounts to edge of the work-surface and is secured by tightening the knob to the work-surface.

*Max Opening: 1 9/16"

Desktop Mounted Clamp w/ Base - Sits on top of the work-surface

*Base dimensions: 2"W x 7 3/4"L

Cubicle Extender Clamp - Clamps to the top of the cubicle panel. Able to adjust the width of the clamp.

*Clamp Opening:
min- 2 1/2" max- 3 1/2"

eSCAPE Acoustic PET SPECS and Fire Rating

Fireproof Test Report

Product Name: Polyester fiber acoustic panel

Specification: 1220*2420*9mm

Sample Base: 3000m2

Sample Status: Meets requirements

Test Standard: GB 8624-2012 Classification of combustion properties of building materials and products

GB/T 20284-2006 Monomer combustion test of building materials and products

GB/T 8626-2007 Test method for flammability of building

Fireproof Level: B1

Sample Quantity: 9m2

Test Results: After inspection, the items in the sample are in compliance with the standard requirements, and the comprehensive judgement is qualified.

Test Item		Unit	Technology Requirement	Test Result	Evaluation	Remarks
Monomer Combustion Test	Combustion growth rate index	W/s	≤250	0		~
	Flame horizontal spread	~	Did not reach the long edge of the sample	Approve		
	Total heat release in 600s	MJ	≤15	1		
Flammability		mm	≤150	10		
		~	No burning drip ignition filter paper	Approve		

Formaldehyde Test Report

Name of Sample	PET Acoustic Panel	Sample No.	STS-D-1806-007
Test Item	Formaldehyde	Test Category	Entrust
Testing Environment	Temperature: 28°C	Humidity: 55%	Barometric Pressure: 100.6kPa
Detection Principle	« Determination of formaldehyde in textiles part one: Free and hydrolyzed formaldehyde » GB/T 2912.1-2009		
Test Equipment	Model		Serial Number
Electronic Scales	BSA224S		STS-SB/H0010
Photometer	UV-2800A		STS-SB/H0020
Test Result	Test the sample according to « Determination of formaldehyde in textiles Part one: Free and hydrolyzed formaldehyde » GB/T 2912.1-2009 and provide measured data.		

Name of Sample & No.	Test Item	Test Result	Detection Limit
PET Acoustic Panel STS-D-1806-007	Formaldehyde (mg/kg)	Undetected	20mg/kg

Sound-Absorption Test

Product Name	Sound-absorbing Board
Test Type	Contracted-out Inspection
Test Date	November 14, 2019
Sample Model	2420mm x 1220mm x 9mm
The sample Status	The samples are in good condition and meet the testing requirements
Testing Environment	Meeting the testing requirement
Test Items	Sound-absorbing Detection
Testing Basis	GB/T 20247-2006 Acoustics-measurement of sound absorption in a reverberation room.

Frequency f(Hz)	Sound Absorption Coefficient <i>a</i>
50	-

Noise Reduction Coefficient: NRC=0.25

Average sound absorption coefficient: 0.34

Product Name	½" PET Acoustic Panels
Material	100% PET(polyester)
Flame Resistant	Yes
Thickness	0.5 in
Density	1300gsm - 3500gsm
NRC	0.6-0.75
Application	Acoustical Solution, Office Furniture
Flame Rating	ASTM E84 Class A
Certification	SGS,Intertek,TUV,OEKO
Surface Treatment	Smooth

Ideal for using in:

- Classrooms
- Libraries
- Quiet learning areas
- Music rooms
- Open plan offices

The acoustic properties of each of acoustic panels are very similar, with all of them absorbing approximately 100% of incident sound energy at mid and upper frequency ranges. Feel free to compare Sabine absorption coefficients at your leisure. These material types are mostly differentiated by their visual appearance. An important consideration for any sound absorption panel is thickness. The manufacturing process of PET is remarkably clean. There is no negative impact on environment. No chemicals are used in conjunction with a very low energy process. PET by All unused product such as scraps cuttings etc. are 100% recyclable and is put back into the manufacturing process to make the fiber. There is NO disposable waste.

Features

1. **Sound absorbing flame retardant:** Eliminate sound impurities, improve language clarity, and become the preferred sound absorbing material for interior decoration.
2. **Thermal insulation:** Polyester fiber is hot pressed by high technology and composed of cotton shape, which absorbs light from low to medium frequency.
3. **Natural environmental protection:** Polyester fiber is hot pressed by high technology and is in the shape of cotton natural and environmentally friendly, non-toxic and harmless.
4. **Health and comfort:** No irritation to the skin, long-term harmless to the human body, good for health.
5. **Pleasing to the eyes and comfortable to the ears.** eSCAPE panels are a universal acoustic solution for every place and need. The panel is made from PET Felt - a soft and porous material, known for its sound-absorption properties. eSCAPE invites you to get creative with numerous colors and a wide range of applications, the design possibilities are truly endless
6. **Simple solutions:** smart production innovations and unconventional material choices that may seem simple at first sight, can drastically improve the product and its environment. the 'mute' PET felt acoustic panel can be installed in many ways, creating different auditory values.
7. **Pleasing to the eye:** As acoustic design has become essential to great spaces; new acoustic design elements are coming to the fore. Felt made from PET plastic (Polyethylene Terephthalate, or recycled plastic water and soda bottles) has leapt into the spotlight as a 'go-to' material that absorbs sound while offering a new palette for both visual and acoustic design.

With excellent service team and advanced technology platform, we provide customers with humanized, professional and modern high-quality services; we are committed to the production, research and development of green building materials and the application of technical innovation, and the authoritative product testing report will create a green and environmental sound environment for you. The company continuously integrates excellent resources in the architectural decoration and acoustic industry, aiming at different customer groups Provide diversified cooperation opportunities and realize win-win value.

ASTM E84

V. Sample Details

Name	Polyester Fiber Acoustic Panel
Color / Density	Black / $\sim 156\text{kg/m}^3$
Size of sections	600mm x 1200mm x 12mm, and 600mm x 120mm x 12mm

Exposed Face:

The front face

Mounting Methods:

The 20-gage, 2-in. (51-mm) hexagonal galvanized steel netting should span the width of the tunnel, then the specimen shall be placed on the netting.

The specimen consisted of 6 pieces of 600mm wide x 1200mm long x 12mm thickness and 1 piece of 600mm wide x 120mm long and all sections jointed end-to-end.

Test Results:

FSI	SDI
5	170

Rating:

The National Fire Protection Association Life Safety Code 101, Chapter 10, Section 10.2.3 “Interior Wall and Ceiling Finish Classification”, has a means of classifying materials with respect to Flame Spread and Smoke Developed when tested in accordance with NFPA 255, ASTM E84, UL 723 “Method of Test of Surface Burning Characteristics of Building Materials”.

International Building Code, Chapter 8, Interior Finishes, Section 803 “Wall and Ceiling Finishes”, was classified in accordance with ASTM E84 or UL723. Such interior finish materials shall be grouped in the following classes in accordance with their flame spread and smoke-developed indexes.

The classifications are as follows:

	Class A	Class B	Class C
Flame Spread Index	0-25	26-75	76-200
Smoke-developed Index	0-450	0-450	0-450

Since the tested samples received a Flame Spread Index 5, and a Smoke-developed index 170, it would meet the requirement of Class A Interior Wall & Ceiling Finish Category.

OBSERVATIONS

Time to ignition (sec)	72
Time to Max. FS (sec)	281
Maximum FS (feet)	1
