SAPPHIRE CUBICLE SYSTEM

The Sapphire Cubicle System® by SKUTCHI Designs Inc. is a sophisticated and versatile workspace solution designed to suit offices and work environments of every size. Whether your organization requires workstations for three employees or three hundred, the Sapphire Cubicle System provides scalable, modular, and fully customizable configurations.

Constructed from exceptionally strong yet lightweight, commercial-grade aluminum, the system's frames and unique connectors allow for virtually limitless wall shapes and workstation layouts. For added functionality, integrated raceways within the frames discreetly accommodate electrical outlets and data cabling, ensuring seamless connectivity.

Panels measure 3 1/4" thick and are available in multiple finishes, including fabric, laminate, PET, and tempered glass, with height options of 32", 39", 52", or 65". Fabric and PET panels come in a wide range of colors, laminate panels feature multiple finishes, and tempered glass options can be clear or enhanced with a variety of film appliques for added privacy or design appeal.

Beyond walls and panels, the Sapphire Cubicle System also offers a wide selection of ergonomic furniture and accessories. Options include sit-to-stand desks, standard desktops, locking file cabinets, shelving, overhead storage, padded-top benches, paper racks, bookshelves, and accessory rails, all designed for seamless integration.

In short, the Sapphire Cubicle System is a complete, all-in-one office solution. It allows you to create cubicle walls up to 65" high and furnish them with coordinated office furniture. For taller partitions or spaces requiring locking doors, our Sapphire Wall System provides additional options.

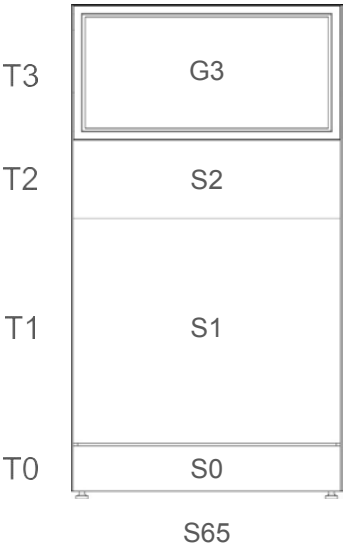

Thanks to its modular design, the Sapphire Cubicle System can be easily expanded, reconfigured, relocated, or upgraded as your workplace evolves. All components meet or exceed the safety and durability standards set by the American National Standards Institute (ANSI) and the Business and Institutional Furniture Manufacturers Association (BIFMA).

- 6" cable channel on the base of each panel, beltline available upon request .
- Panel thickness: 3 1/4"
- Glass thickness: 3/8"
- Frames & connections: Aluminum
- Optional interior furnishings available
- Custom and quick-ship options available
- ANSI/BIFMA
- Fabric ISO 9001
- Electric: UL Listed

Example SKU: S65-S0-S1-S2-S3

Tile Style & Location

- | Styles: | Location: |
|--------------|----------------|
| Standard (S) | T0 (0) Raceway |
| Custom (C) | T1 (1) |
| Glass (G) | T2 (2) |
| | T3 (3) |
| | T4 (4) |

- *Note:**
- Locations are from bottom tile to top tile
 - "-" Indicates additional tile
 - Multiple numbers after the style letter indicates a combination of positions

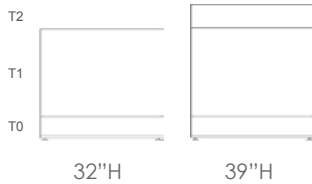

Material Key:

GF	Frosted Glass	PT	PET
GC	Clear Glass	MB	Markerboard
LM	Laminate	RW	Raceway
FP	Fabric over PET	SW	Slot wall
FL	Fabric over Laminate		

*Additional Notes:

- For all available materials and finishes, see page 31-36
- Any raceway can be replaced with a laminate alternative, however electrical cannot be accessed if this is done.
- Panel width must be continuous throughout each panel built.
- Some tile combinations need custom panel frames. These combinations are marked.
- All tiles are priced as singles.

Sapphire Wall System Electric Raceway—Closed

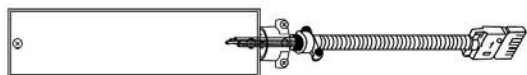

Sapphire Wall System Electric Raceway—Open

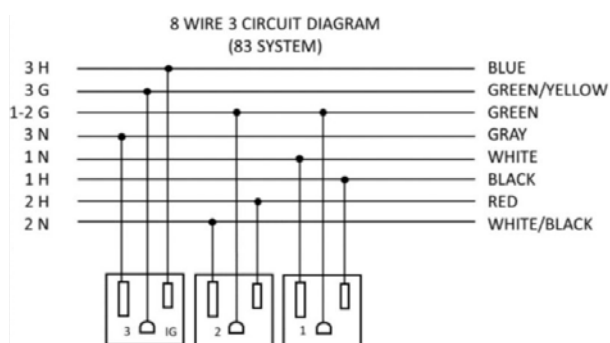

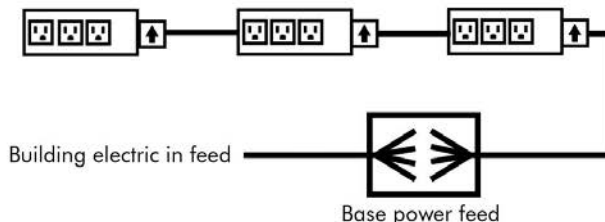

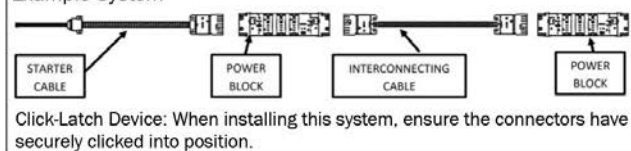

⚠ FINAL CONNECTION IS DONE BY A LICENSED ELECTRICIAN

WARNING: Risk of fire or electric shock. As with all non-directional systems, do not electrically connect panel to more than one supply source. Always determine that the panel is electrically connected to one and only one source of supply. Before using any equipment, check the entire system for polarity, continuity, and grounding integrity.

Example System

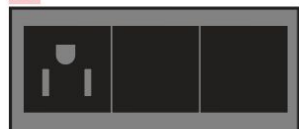

Power Supply Connection

The Power System is an eight wire system consisting of four individual circuits rated at 20 amps/120 volts maximum. Circuit 1 (black), circuit 2 (red), and circuit 4 (pink), are served by a system neutral (white) and an equipment ground (green). Circuit 3 (blue) uses an isolated neutral (gray), and an isolated ground (green/yellow). The system may be supplied by a three phase power system with four individual circuits rated 20 amps/120 volts maximum, or as permitted by local code.

When connecting electric pass throughs to power moduls, please make sure ARROW is up
