

PARAMETRIC WALL ART

PARAMETRIC WALL ART

The Parametric Acoustic Wall Art from the eSCAPE Acoustic Solutions collection combines sound control with sculptural design to create functional wall features that enhance both acoustics and visual impact. Designed for modern office environments, corporate interiors, and collaborative spaces, these panels help reduce noise while adding dimensional texture and architectural interest.

FOCUS

Create spaces where productivity thrives. The sculptural geometry of eSCAPE™ works with high-performance PET acoustic material to help reduce distracting reflections and soften ambient noise. The result is a calmer, more controlled sound environment that supports concentration, clarity, and collaboration.

IMPACT

Make a statement the moment someone walks in. eSCAPE™ transforms a functional acoustic solution into a commanding architectural feature. Its dimensional parametric form adds depth, texture, and visual energy — often becoming the focal point of the room and an effortless conversation starter.

DEFLECT

Control sound with design, not compromise. The three-dimensional parametric surface helps diffuse sound waves while PET naturally absorbs them, reducing harsh reflections and unwanted echo. It's acoustic performance built into sculptural form — engineered to improve comfort without sacrificing aesthetics.

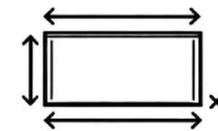

Made in America
Proudly manufactured in the USA with uncompromising quality and craftsmanship.

100% Recycled
Crafted from 100% recycled PET, delivering sustainable performance without compromise.

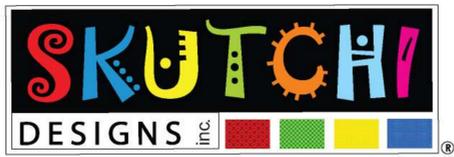

Always In Stock
Readily available and prepared to ship when your project timeline demands it.

Custom Sizes
Built to your exact width and height for a precise, seamless architectural fit.

Custom Designs
Fully customizable in form, layout, and finish, built without limits to match your vision.

ACOUSTICAL & PRIVACY SOLUTIONS
PRODUCT LINES

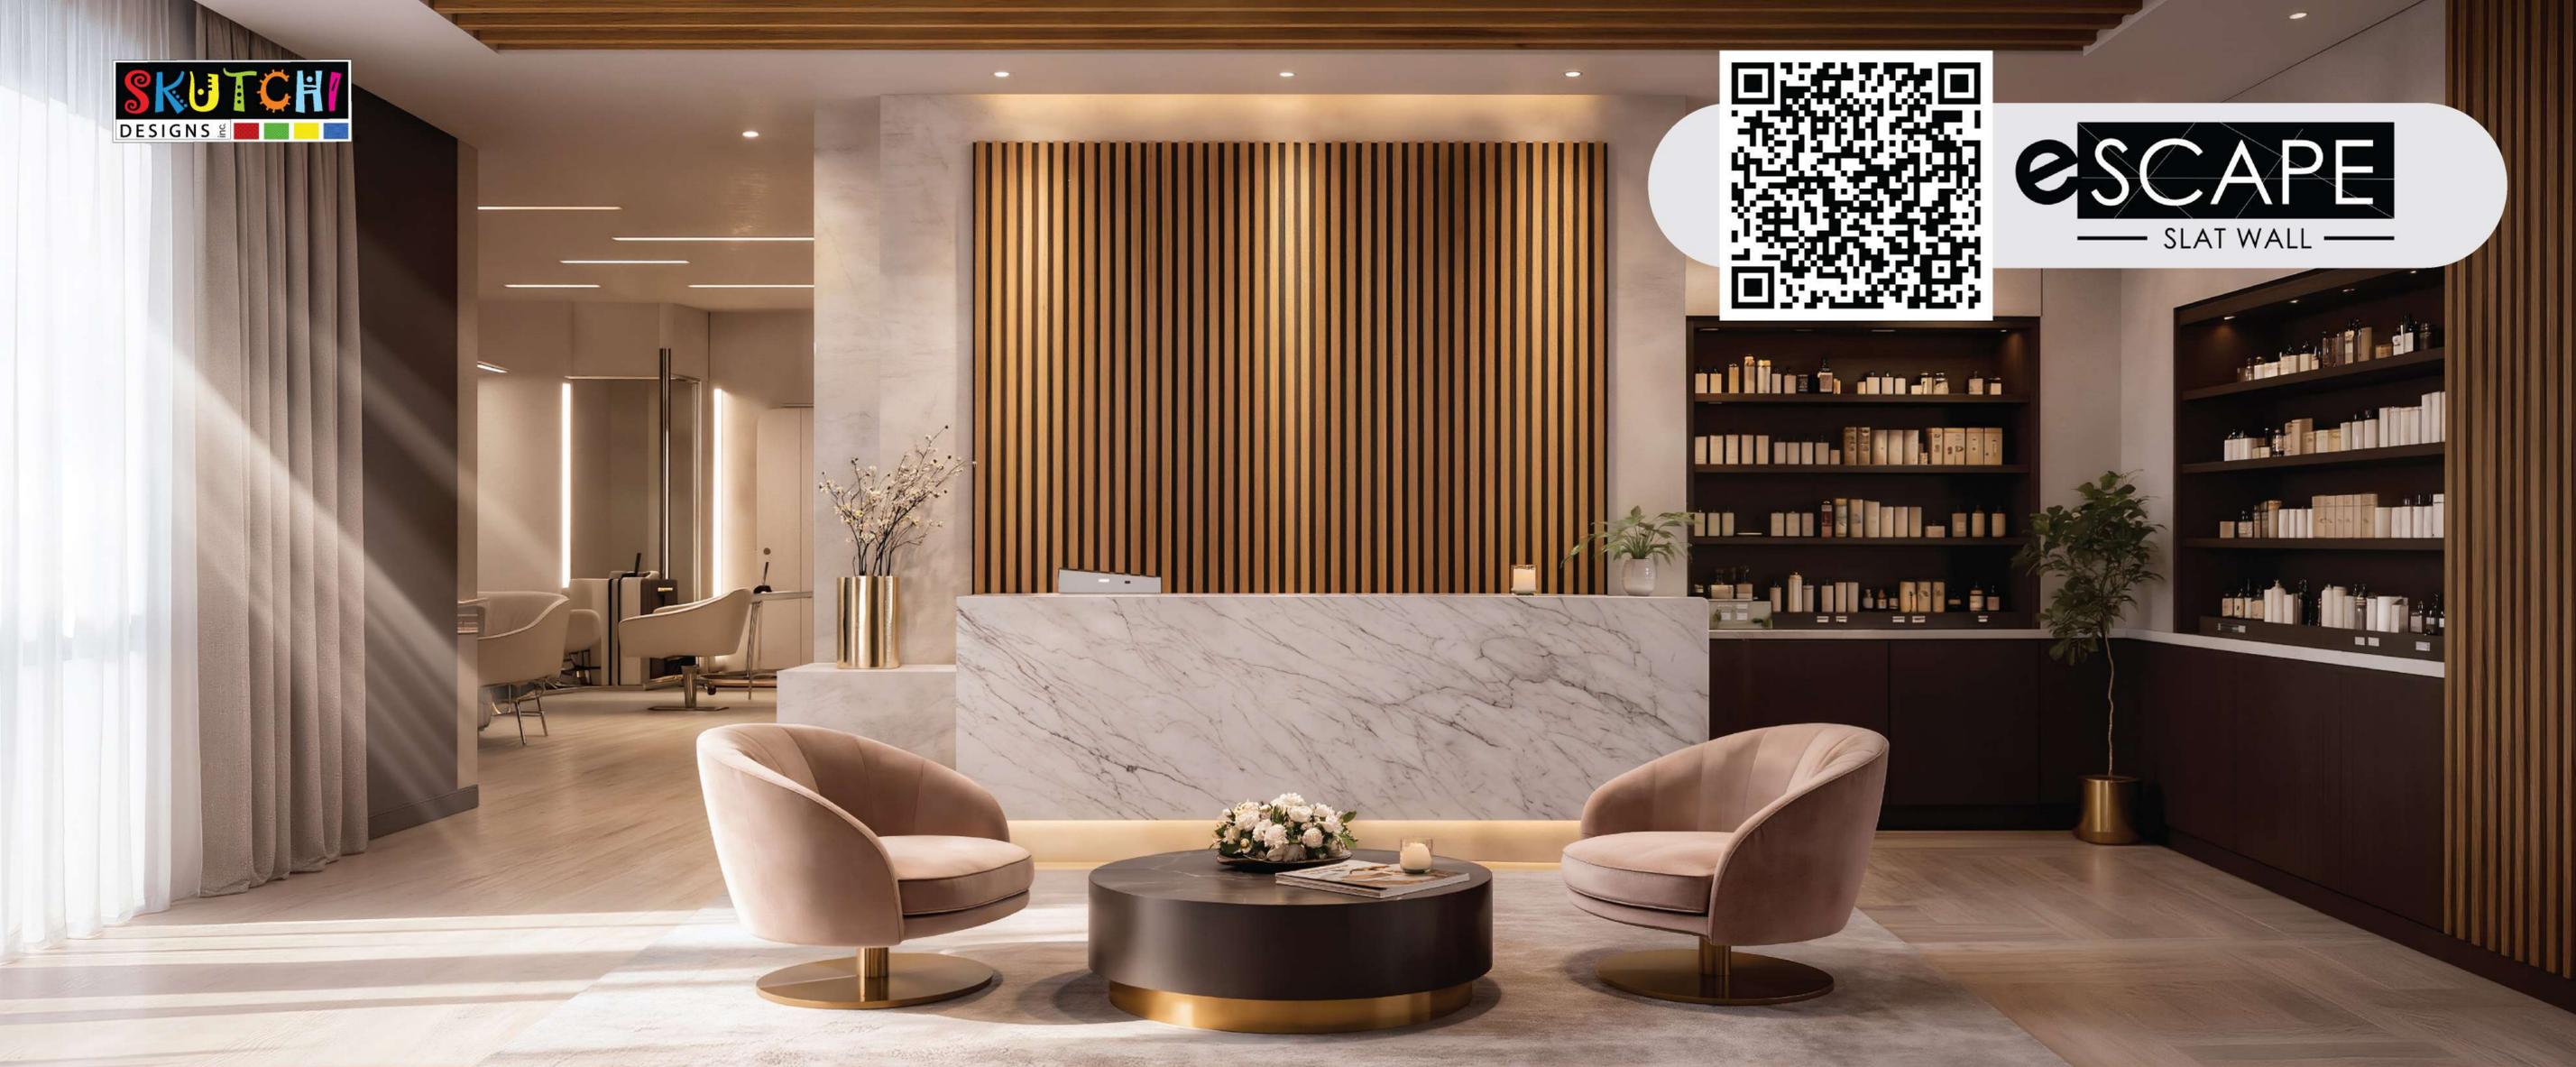

DESK DIVIDERS

Reduce distractions while maintaining an open, collaborative feel. Our acoustic desk dividers absorb sound, add privacy, and install easily in modern workspaces without disrupting design flow.

CUBICLE PANEL EXTENDERS

Increase privacy and reduce noise in open workspaces with sleek, easy-to-install panel extensions. Available in multiple widths and heights, they enhance focus without replacing your existing cubicles.

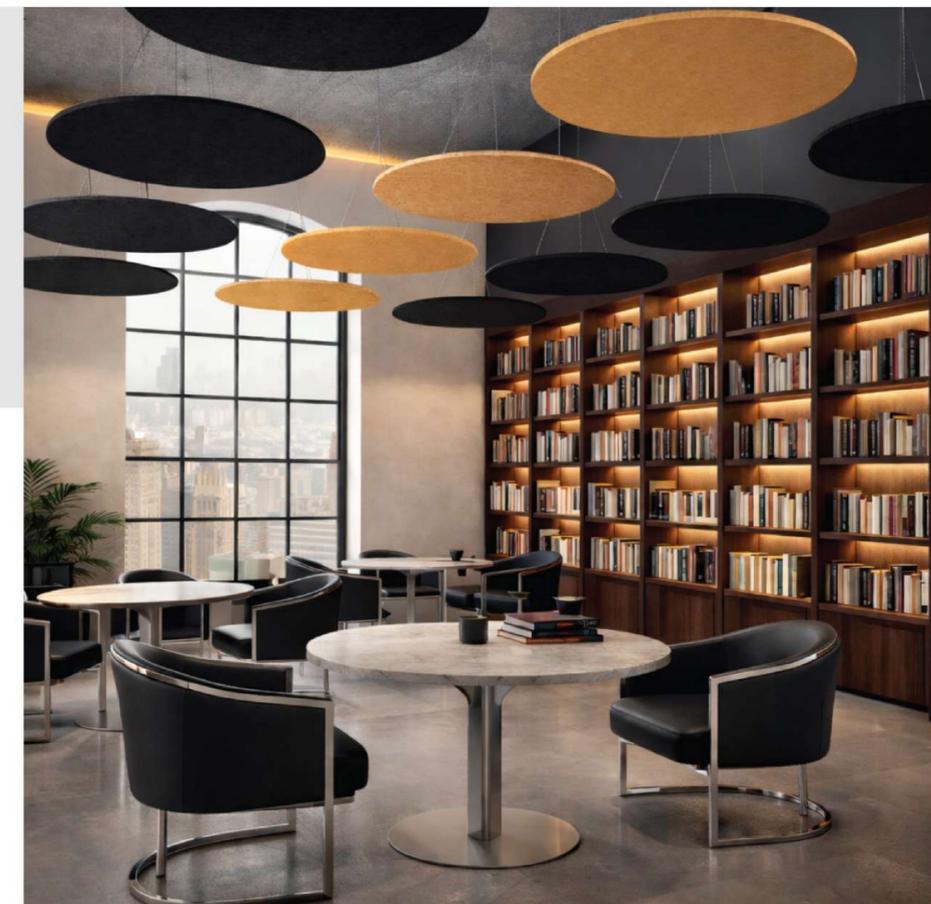

ACOUSTICAL CEILING PANELS

Elevate acoustics overhead with suspended hanging panels that absorb sound and soften echo. Available in cloud, star, circle, and custom shapes — designed to enhance both performance and visual impact.

ACOUSTICAL CEILING BAFFLES

Improve acoustics from above with suspended ceiling baffles that reduce echo and ambient noise. Designed for open offices and commercial spaces, they deliver both performance and visual impact.
